

## Tube Box S

### MM/MC phono preamplifier with tube output stage

- Audiophile Performance
- Audiophile-grade ECC83 tubes (12AX7)
- Dual mono configuration
- Audiophile-grade polypropylene WIMA capacitors
- Precise RIAA equalisation
- Switchable input impedance/capacitance
- 3 adjustable gain levels
- Subsonic filter
- Outstanding sound quality

<b>Input impedance</b>	10/100/1k/2k ohms(MC)/ 47k ohms (MM)
<b>Input capacitance</b>	50/150/270/370pF
<b>Gain switch</b>	41/51/61dB
<b>Signal-to-noise ratio</b>	MM (41 dB): 84dB (94dB – IEC -A) MC (51/61 dB): 67dB (75dB - IEC -A)
<b>THD</b>	0,01% MM/ 0,05% MC
<b>RIAA deviance</b>	max. 0,4dB / 20Hz - 20kHz
<b>Subsonic filter</b>	-12dB @ 20Hz (non switchable)
<b>In/Out sockets</b>	1 pair RCA connectors
<b>power consumption</b>	470mA / < 1 watt in standby
<b>oversized power supply</b>	18Volt DC/1000mA
<b>Dimensions (WxHxD)</b>	103 x 74 x 104 mm 103 x 74 x 115 mm (with sockets)
<b>face plate colour</b>	silver or black
<b>weight</b>	810 g net

#### Tube Box S: audiophile, versatile & affordable!

*This new phono preamplifier with tube output stage offers unrivalled performance and unique flexibility, which never before was available at this price! Sonic quality of Tube Box S is extremely impressive, a big improvement to Phono Box S and an audiophile upgrade for most analogue hifi system. With a wide range of setting parameters, it can meet the needs of almost any phono cartridge on the market. Carefully selected audiophile-grade components make it possible to enjoy your valuable vinyl collection like never before!*

*The class-leading music reproduction of Tube Box S gives pure dynamics, full transparency, analogue warmth, bass texture, detail resolution and purity of all audible frequencies. >>> **Best-buy tube phono preamplifier!** <<<*
