Ingenious entry to the world of audiophile luxury

RPM 3 Carbon utilises evolutionary enhancements to improve the performance of RPM series: A **low resonance chassis** holds an inverted platter bearing with **ceramic ball** for further **reduced rumble**. An outboard 15V AC motor is smoothly driven using an ultra precision AC generator with DC power supply for further **enhanced speed stability**.

A **10" S-shaped tonearm tube** is made from carbon fibre, aluminium and resin. Using a complex 3-step process with heat treatment and 100bar pressure, **arm tube rigidity** is **strengthened**, **internal damping** is **maximized** and **resonances** are **reduced to a minimum**. This makes the tonearm also suitable for **MC cartridges**. Additional features are a **magnetic antiskating** mechanism and a **TPE-damped counterweight**. All ingredients add up to a **miracle in sound** for the price and **ultra-stylish look!**
