

FE206En

Features

- ES cone and center cap are adapted. This new diaphragm material has the fine, supple and high density fiber, and its characteristics successfully improve the mid-high frequency reproduction.
- $\phi 146\text{mm}$ strong ferrite magnet is employed.
- Well tuned Qts / Mms values for ease of use in the back loaded horn enclosure.

Recommended Back Loaded Horn Type Enclosure

- This example shows a 'back loaded horn' type enclosure for FE206En.
- FE206En's magnetic circuit with $\varnothing 146\text{mm}$ large ferrite magnet provides sharper resonance and makes the unit suitable for a back loaded horn type enclosure.

- 21mm thick plywood is used for main section and side panels to ensure a strong enclosure.
- Two way system using super tweeter T90A is also recommended.
