## RBT-95

Number: 10.2250

**Ribbon tweeters, 60 W<sub>MAX</sub>, 30 W<sub>RMS</sub>, 8 Ω**

- Magnetostatic speakers of a high efficiency
- Perfectly fine dynamic reproduction of the high range and the brilliance frequency range
- The power capability of the system can considerably be increased by voltage dividers and maybe higher crossover frequencies (level attenuations which take tweeters to the level of normal hi-fi systems)
- Very light sound of low distortion which particularly improves the stereophony in applications from 5 kHz on
- By adding a super tweeter above 8-10 kHz, e.g. even high-quality full range systems can be further improved

**RBT-95: round**

**RBT-95SQ: square**
